---

Today on *Baseball Prospectus*, I delve into the Miami Marlins self-inflicted attendance woes (see [Bizball: The Marlins Sinking Attendance](#) ). The early decline could rate as historic by the end of the season as they could challenge the then Tampa Bay Devil Rays as the worst attendance decline in the second year of a new ballpark. As I write for BP:

*In poll after poll, column after column, Jeffrey Loria is ranked as the worst owner in all of North American professional sports.*

*Loria is bad for fans, but he treats himself and the partners in the club well. He and club president David Samson were able to bamboozle politicians and taxpayers in Miami-Dade County to the tune of \$500 million for a brand-spanking-new ballpark on the former site of the Orange Bowl. They opened up last season in that freshly minted stadium after being the darlings of the 2011 Baseball Winter Meetings, at which they signed SS [Jose Reyes](#) to a six-year, \$106 million deal, starter*

[Mark Buehrle](#)

---

to a four-year, \$58 million contract; and closer

[Heath Bell](#)

to a three-year, \$27 million deal with an option for 2015. All told, the Marlins splurged \$191 million at the meetings, and it could have been more, as it looked for bit like they were going after

[Albert Pujols](#)

. Imagine that.

In mid-November of last year, the club promptly moved Reyes (2013: \$10M, 2014: \$16M, 2015: \$22M, 2016: \$22M, 2017: \$22M, 2018: \$22M club option with \$4M buyout), [Josh Johnson](#) (2013: \$13.75M), Buehrle (2013: \$11M, 2014: \$18M, 2015: \$19M plus a \$4M deferred signing bonus),

[John Buck](#)

(2013: \$6M), and

[Emilio Bonifacio](#)

(who is arbitration eligible this year), and \$4 million (or potentially more) in cash to the Blue Jays for

[Yunel Escobar](#)

,

[Henderson Alvarez](#)

,

[Adeiny Hechavarria](#)

,

[Jeff Mathis](#)

, minor-league pitchers

[Justin Nicolino](#)

and

[Anthony Desclafani](#)

, and minor-league outfielder

[Jake Marisnick](#)

. All told, the Marlins stripped \$163.75 million off the books, and the baseball world screamed “fire sale” at a club that at one point was featured on Showtime’s “The Franchise” and had

[Ozzie Guillen](#)

as its manager. Loria had done what Loria had always done before: make rash decisions, all of which soil any chance of creating goodwill in the community. And the Marlins, in their best Stuart Smalley, looked at themselves in the mirror and said, “Doggone it, people like me.”

With that as the backdrop, I made some predictions before the season started on Twitter that weren’t that much of a leap to make. [I said](#) the Marlins wouldn’t sell out a single game this season (since Opening Day wasn’t a sellout, chances are good they won’t get one going forward), [and added](#) that they would see largest drop in attendance for a second-year ballpark among all MLB stadiums built in the last 25 years.

As of today, the decline would be 31 percent below what the club ended with last season. But, they are currently averaging 18,864. As of May 5 of last season, they were averaging 30,681, down 11,817 from the previous year, or a decline of 39 percent.

So, it's very possible the Marlins could end worse than the Rays. It's early, and anything could happen, but odds are good the Marlins aren't going to get any better in the standings and Loria certainly didn't make any extra friends in the offseason.

Below shows every new ballpark built under the Selig tenure. It shows the average attendance prior to the new ballpark opening in the old ballpark; average attendance in the first year of the new ballpark; the winning percentage in the first year of the ballpark; average attendance in the second year of the new ballpark, and finally; the percentage of increase or decrease from the opening year in the new ballpark. As of now, the Marlins are averaging just 92 more per game than their last year in Sun Life Stadium that they shared with the Miami Dolphins, was never designed for baseball, and had no roof.
