The NFL may rule television ratings, but when it comes to digital media and sports, Major League Baseball is king. MLB Advanced Media has become a gold-standard that other leagues try and emulate, and the digital-rights arm of baseball has ruled the mobile app world.

So, when the latest version of Apple's highest-grossing app, MLB.com's At Bat 13 is released, fans take notice. It's out, and with it, Spring Training is not far behind.

The latest offering released on Thursday sports new functionality, is cross-platform, and hosts a new mobile platform.

As was the case last year, you can download it for free if you are a MLB.TV Premium subscriber. Unlocking all the features requires an MLB.TV Premium subscription which runs \$129.99 for the season, or you can get it for \$24.99 a month. Fans also may subscribe to MLB.com At Bat 13 for the one-time annual fee of \$19.99, covering the entire season through the World Series. iOS users may pay \$2.99/month with the recurring billing offer. A nice touch this year is that those that had At Bat last season will not need to download a whole new version if on Apple platforms, as in years past. A push update was released, and users that upgrade simply need to provide MLB.TV Premium subscription details or opt for the "Lite" version.

As mentioned, it's an MLB.TV sub, so you'll be able to watch on your computer, or other supported devices such as Xbox 360, Sony Playstation 3 system, Apple TV, WD TV, Roku, internet connected Panasonic, Samsung and LG TVs and Blue-Ray players, as well as Boxee (
